

KojiSal-Cab Serum

MIXING INSTRUCTIONS: Prior to first use, your KojiSal Brightening Serum must be compounded to mix the power actives into the serum solution. (THIS IS CRITICAL—if not done, the serum will not be effective.) Carefully pour the contents of the power vial into the amber bottle, recap, and shake gently for 1-2 minutes until all particles are dissolved. If the bottle is stored upright, you can replace the small cap with the dropper top. Your serum is now ready for use!
